A 1980 Ellenville New York High School graduate. After completing 2 years in the Paralegal program at Sullivan County Community College in 1982, I began a career as a Stage Manager that lasted 18 years. I then began my pest management career in 2000 in Liberty NY with Pestech Pest Solutions as an apprentice in the field. Training under the tutelage of senior technicians I quickly immersed myself in learning advanced treatment techniques and protocols. Basic pest control methodology lead to delving further into the biology of pests, life cycles and identification. Based upon this knowledge, I co-authored many of the protocols that Pestech still uses today for treatment of various pests. Moving through the company ranks from technician, purchasing, human resources, technical director, and team leader, ultimately becoming a branch manager. I continually expanded on this knowledge and added additional certifications with the NYS Department of Environmental Conservation.

In 2015 I moved to the state of Delaware and joined Activ Pest Solutions as their Technical Director, immediately training for and receiving my Delaware Department of Agriculture Structural and Rodent, Termite, and Public Health certifications. I didn't stop there, by pursuing and receiving my Associate Certified Entomologist certification in 2017. I am a current member of the Entomological Society of America, the National Pest Management Association, Pi Chi Omega fraternal organization, and was elected the President of the Delaware Pest Control Association in 2021. In 2020 I joined the NPMA's leadership by becoming a member of the NPMA By-Laws committee and in 2021 I was selected to serve on the Entomological Society of America's Leadership Development Committee. Expanding on my pest control career repertoire, I now offer state approved continuing education credits to those under my tutelage. My wife, of 36 years, and I, currently reside in Long Neck, DE.
