

Dr. Janis Reed, BCE

Technical Services Manager, PCO

Control Solutions Inc.

Janis brings with her more than twenty years of experience including more than a decade with a large, independently owned pest management company as the staff entomologist and technical director. Other roles include several years of research and pesticide education experience.

Janis completed a BS, MS and her Ph.D. in Entomology all at Texas A&M University, with a focus in Urban Entomology. Her research and interests include social insects, especially ants, as well as foraging and feeding preferences of insects. Janis holds and maintains her accreditation as a Board-Certified Entomologist and has been a licensed structural pesticide applicator since 2000 in pest control, termite control, lawn and ornamental pest control, and weed control.

In her role with CSI she works with industry researchers for product efficacy trails, supports the CSI sales and marketing teams, and supports the pest management industry on behalf of CSI.
