

Jim Fredericks, PhD, BCE

Biographical Sketch

Jim is the Senior Vice President of Technical and Regulatory Affairs for the National Pest Management Association (NPMA) and has been with NPMA since 2010. He is responsible for NPMA's technical resource and support efforts, while also providing strategic direction for the Association's State and Federal public policy efforts. Additionally, Jim serves as the Executive Director for the Pest Management Foundation, a non-profit foundation whose mission is to advance the pest management industry through education, research, and training. Jim is a Board-Certified Entomologist and has earned a Bachelor's degree in Biology Education from Millersville University of Pennsylvania, and Master's and Doctoral degrees in Entomology from the University of Delaware.

Jim began his career in 1999 and spent the first 11 years in the industry working for a large regional pest management firm serving the Mid-Atlantic states.
